

Jerusalem, Hechvan 7, 5766

To Rabbi Raphael Afilalo

It is important news for the publishing world to propose a dictionary in English on the wisdom of Israel – The Kabbalah.

But let's not forget, that this anthology of words from the highest tradition, gathered in a nomenclature of variable importance, and presented according to the teachings of the Zohar and the Ari Z'al, provides on each word an amount of relative information on its immediate meaning, on its use in the Lurianic Kabbalistic literature and intended for a well defined public.

Like a medical dictionary intended for professionals, this work can not be intended for a wide and general audience.

This dictionary on the Kabbalah will be of precious use for serious students already studying the main texts and wishing to further understand the concepts. Of course, only the learning with true masters of this esoteric tradition will allow an enlightenment of what is obscure.

This dictionary will give the reader a just and faithful idea of the authentic Kabbalah, allow him to further expand his knowledge and walk on a clear and concise path.
